-Dilation: Pupil dilation is an important part of our comprehensive eye exam and is offered at no additional charge at this visit. A dilated pupil allows a much more thorough view of structures in the back of the eye. It may allow us to detect otherwise undiagnosed cataracts, glaucoma, diabetic retinopathy, macular degeneration, tumors, retinal detachments and many other serious conditions. The most common side effects are increased sensitivity to light and reduction in near focusing ability. Some farsighted patients may experience difficulty driving and may wish to schedule the dilation when they have a driver, but an office fee will be incurred. The effects of the dilating drops usually last 2 to 6 hours, but duration may vary.

-Polycarbonate Lenses: Polycarbonate lenses are the most impact resistant lenses available. They are strongly recommended for patients with compromised vision in one eye, patients who are active in sports or work with power tools, and patients under the age of eighteen._____

-Consent to Treat: Each patient may choose to accept or decline treatment options. Treatment options include, but are not limited to, eye examinations, fitting for contact lenses, diagnostic procedures, medical treatment or referral for treatment.
I understand that I have the option to accept or decline the treatment options as offered and explained. _____

-Privacy Statement: Your privacy is important to us and we will strive to protect it. We will not disclose patient information to non-privileged parties. We will not sell any personal patient information to any third parties. Insurance plans require the release of information needed to disburse payments and ensure that adequate care was received. Medical referrals and co-management require the sharing of information for treatment purposes. We contact our patients to confirm appointments and to remind them of visits that are due. From time to time we will contact select patients to notify them of new treatment options available or promotional events.
